

Splash Screen before the login screen showing logo.

Not Registered

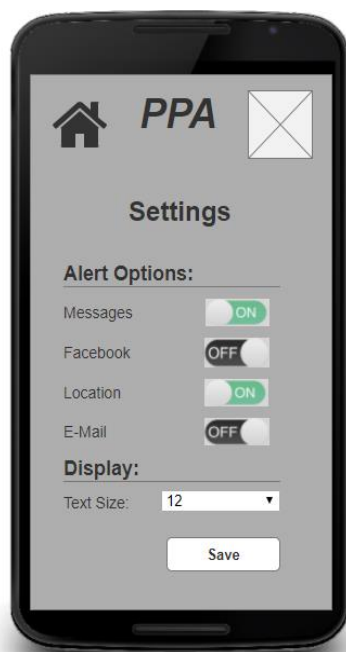

Once Registered

Contacts will be put into settings and location will be removed, Settings moved to top right of the screen. Off button added to the bottom left of the screen. Button in middle stays.

Settings

The idea is to have a similar design except have a list of your contacts and once they are clicked on will give the user the option to use these sliders for each individual contact.

We need to find out what the colour scheme is.
